New in this Release

This section lists the enhancements to Query Manipulation Server version 12.2.0.

- QMS can use synonym rules to expand exact phrase searches. To expand exact phrases by default, set `ExpandPhrases=TRUE` in the `[Server]` section of the configuration file. You can override the value of this configuration parameter for individual actions by setting the `ExpandPhrases` action parameter.
- QMS uses the action ID it receives in a `GetSynonyms` or `GetSynonymKeywords` action to set the action ID for actions that it sends to the `AgentStore` to fulfill the original request.
- Elliptic Curve certificates and keys are supported, to enable the use of ECDSA and ECDH ciphers in TLS communications.

Resolved Issues

There were no resolved issues in Query Manipulation Server version 12.2.0.
